Md Mahfuj Ahmed

Full Stack Developer · TypeScript · Vue.js · Next.js · Firebase · MongoDB
+1(437)-808-4685 | ahmedmahfujsy@gmail.com | mahfuj.dev | LinkedIn | GitHub | Winnipeg, MB

SUMMARY

Full-stack developer with production experience building and shipping TypeScript applications end-to-end — from API/backend design to frontend delivery. Built EventFlow, a full-stack event ticketing and CRM platform on Vue 3, Firebase, and MongoDB with serverless functions on Netlify, backed by a Playwright/GitHub Actions CI pipeline and shipped through reviewed pull requests. Built RoleReady's complete backend (auth, data persistence, AI-integration routes) and frontend in Next.js, and has hands-on Django REST API experience from professional work at LIILAB. Diploma in Full Stack Web Development from Red River College Polytechnic, Winnipeg, MB. Builds AI-first, using Claude Code as part of a daily development workflow.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, C++
Frontend: Vue.js, React, Next.js, Tailwind CSS
Backend: Node.js, Netlify Functions (serverless), Django, Django REST Framework, REST API design
Database & Auth: MongoDB, Firebase, PostgreSQL, MySQL, Supabase
Tools/Workflow: Git, GitHub (branches, PRs, code review), GitHub Actions (CI/CD), Playwright (E2E testing), Stripe API, Docker, Vite, Webpack, vue-tsc, Claude Code

PROJECT EXPERIENCE

EventFlow *Full Stack · Vue 3 · TypeScript · Firebase · MongoDB · Netlify Functions · Stripe* GitHub · Live

- Built a full-stack event ticketing and CRM platform end-to-end — Vue 3/TypeScript frontend, TypeScript serverless backend on Netlify Functions, MongoDB for event and order data, and Firebase for authentication.
- Implemented guest checkout with Stripe test-mode payments (no account required to purchase), plus an email-matched account-claim flow for returning guests.
- Built a host onboarding and approval pipeline — application form, admin review, and automated approval/notification emails.
- Shipped a host dashboard with live ticket-sales and revenue reporting, plus full event CRUD with sold-ticket safeguards; deployed and maintained on Netlify with environment-based configuration across Firebase, MongoDB Atlas, and Stripe.
- Built a 10-spec Playwright end-to-end test suite (checkout, auth, host onboarding, dashboard) and wired it into a GitHub Actions CI pipeline that gates every pull request against a dedicated test database — merged through 8 reviewed PRs across feature branches.

RoleReady *Full Stack · Next.js · TypeScript · Prisma/Neon · NextAuth v5 · Google Gemini · Groq API · Whisper* GitHub · Live

- Designed and built the complete backend for an AI interview-coaching platform in Next.js — API routes for resume/job-description intake, gap analysis, and tailored question generation, backed by Prisma/Neon (PostgreSQL), with end-to-end authentication via NextAuth v5.
- Integrated Groq Whisper for real-time speech-to-text and Google Gemini for structured feedback scoring (Relevance, Depth, Communication), designing the API contract between frontend and AI services.
- Shipped full session reporting (overall score, per-category breakdown, improvement insights) with a polished, accessible UI — deployed live on Vercel.

Game Hub *Vue 3 · TypeScript · Pinia · TanStack Vue Query · Apollo Client · GraphQL · Vite · Vue Router v5* GitHub · Live

- Built a Vue 3 game discovery platform with Composition API and TypeScript throughout — typed composables, a generic APIClient<T> wrapping Axios for REST, TanStack Vue Query for caching/infinite scroll, and Apollo Client + GraphQL as a secondary data source, with Pinia for global filter state across Vue Router v5 routes.

Portfolio — mahfuj.dev — Next.js portfolio site with an automated blog-publishing pipeline.

PROFESSIONAL EXPERIENCE

Junior Software Engineer · LIILAB · Sylhet, Bangladesh Feb 2021 – Oct 2022

- Developed RESTful APIs using Django for a high-traffic e-commerce platform, enabling efficient data synchronization between backend services and frontend clients.
- Built full-stack e-commerce features with Next.js, TypeScript, and React Query, pairing scalable data-fetching with backend API work.
- Automated CI/CD pipelines with GitHub Actions for zero-downtime deployments.
- Collaborated in code reviews, database schema design, and UX research as part of a cross-functional team.

EDUCATION

Diploma in Full Stack Web Development · Red River College Polytechnic, Winnipeg, MB Sep 2023 – Aug 2025

- Group Champion — Sprint to Innovation 2025 (Canada Life, Tech Manitoba & RRC)
- AWS Academy Cloud Foundations Certification
